// THE NEUENHAUSER GROUP OF COMPANIES

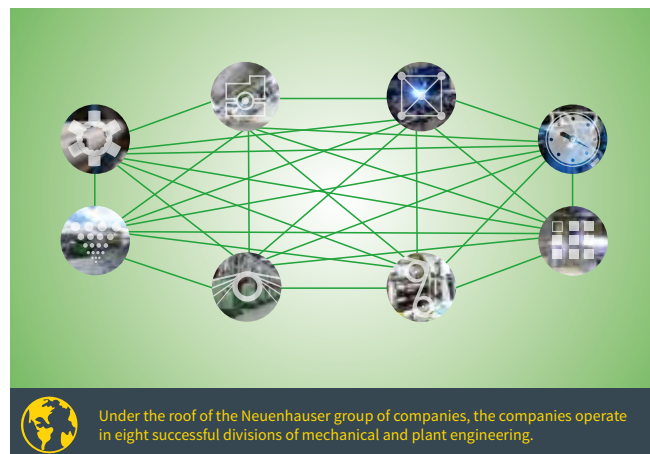

Acting independently • Working together

The individual companies within the Neuenhauser group of companies act independently of one another whilst at the same time forming an effectively-linked network.

// THE NEUENHAUSER GROUP OF COMPANIES

Innovation through communication

The Neuenhauser group employs approximately 2,800 people worldwide, each of whom incorporates their individual strengths and ideas into every project.

Under the roof of the Neuenhauser group of companies, the companies operate in eight successful divisions of mechanical and plant engineering.

COMBINING ABILITIES • ENGINEERING INNOVATIONS

Our individual companies act independently within their branches whilst simultaneously forming an effectively-linked network in which experience, know-how and modern technology are merged.

The mission statement of the Neuenhauser group of companies includes the close cooperation with its customers. We develop and realise optimally-tailored solutions for our clients which save time, costs and energy. All the companies in the Neuenhauser group offer innovations based on trustworthy communication.

PARTNERS FOR COMMON OBJECTIVES

We ensure that whatever our customers envisage becomes possible on time and in accordance with specifications. We rely on the expertise and experience of our employees to utilise the latest technology to achieve the best results for each company. We achieve the high quality standards for our clients' products through process-optimised workflows and the use of ultra-modern technologies.

// INNOVATION IS GENERATED THROUGH COMMUNICATION

A good team consists of many individuals

The Neuenhauser group of companies is characterised by a respectful, appreciative and open company culture.

AT HOME IN NEUENHAUS

A LOCATION WHICH GROWS

The group of companies, which is also represented in Asia and North America, continues to rely on Neuenhaus as its central location, with its approximately 750 employees. Here, where everything began, is where the future is still being created. Neuenhauser relocated to their current site on the Hans-Voshaar-Straße in the year 1972. Over the following decades, the site area multiplied to fourteen times its original size in Neuenhaus alone.

65 YEARS OF NEUENHAUSER

APPRECIATION OF ITS HERITAGE

The path from a little locksmith's business to a group of companies with numerous business units was forged by industriousness, force of innovation and the readiness to consistently participate in technical advancements. Over the years, the Neuenhauser brand has consistently developed and today impresses customers in many specialist fields.

COMPANY PHILOSOPHY

ACTIVE CO-DESIGN OF DEVELOPMENTS

In order to secure the future sustainability of the group of companies, the management structure is consistently under development. Through partnership dialogue, we ascertain balanced solutions and master the increasing number of challenges which result from globalisation and digitalisation. We conduct our collaborations actively, honestly and directly.

MANAGEMENT

COMMUNICATIONS AT EYE LEVEL

A team can only grow together through openness, fairness and honesty. In the Neuenhauser group of companies, dialogue, responsibility and participation belong to the fundamental values. We speak with each other, listen to each other and encounter each other with mutual respect. We also employ this authentic form of communication with our customers.
